

AERONAUTICS

Manufacturing & Maintenance
Solutions and Services

www.reel.fr

REEL is a **global leader** in delivering complex and robust lifting and handling equipment to sectors where safety and reliability are major concerns.

As an integrated engineering company, we design, manufacture, commission and maintain high-performance solutions adapted to ever evolving markets and client requirements.

Our 70-year track and record of excellence and 2,000 dedicated employees make us the partner of choice in the energy, aeronautics, offshore, defense, metallurgy, industry and environmental sectors.

We work closely with clients to improve their production processes, providing solutions that are integrated, sustainable and optimized, both technically and economically.

Our aeronautics business

With 50 years of experience in designing, manufacturing and maintaining equipment for aerospace industry, REEL can rely on a strong engineering and operational experience.

More than 300 professionals are involved in aerospace industry, providing equipment and services to aircraft manufacturers, and airlines.

Over the past seven decades,

We've built a reputation as the industry's most trusted partner. An unwavering commitment to our values and to your success lies at the heart of this reputation. So does our determination to foster a zero harm culture that ensures the health and safety of your employees as well as our own.

Safety is both an absolute priority and shared culture at REEL. Optimal performance requires complete safety. At REEL, they go hand in hand.

A dedicated safety team oversees every activity on your site. We hold more than 120 safety training sessions annually to embed our zero harm mindset across our organization.

Our comprehensive safety tools and management system also help keep employees and contractors healthy and safe.

OUR VALUES

A trusted
partner

The moment you partner with us,

We get into high gear. And You get a highly knowledgeable partner that's fully committed To ensuring your success. Whatever area of your operations we're optimizing, our goal is always to exceed your expectations.

From the initial concept to project execution and comprehensive after-sales services, every REEL employee assigned to your project is focused on the same thing: delivering excellence, on time and within budget, while fostering a zero harm culture.

A dedicated project management team draws on industry best practices to minimize your operation and maintenance costs as well as optimize your lifecycle management. Integrating the latest technologies allows us to take your operations to a whole new Level of efficiency and productivity.

THIS IS OUR COMMITMENT TO YOU.

COMMITTED
TO YOUR
SUCCESS,

every step of
the way

**Integrator of
aircraft Final
Assembly Lines
and aircraft
maintenance
equipment**

Over 50 years experience
in production process.

Supply of integrated
solutions with commitments
on performances :
production rates, total Cost
of Ownership.

Facilities maintenance
services into **operational
conditions.**

“ At the heart of the
manufacturing
process ”

Airbus A350, A330, A380 Final
Assembly Lines,

•
Airbus A350 center wing box
assembly line,

•
Airbus A320 nose Moving Line,

•
Aircraft Paint Shops,

•
Special machines and test bench.

**OUR SERVICE
TEAMS, LOCATED ON
THE PRODUCTION
SITES, ENSURE THE
MAINTENANCE OF ALL
INDUSTRIAL MEANS.**

“Moving Line Innovative and lean management solutions”

To meet our customers' expectations, we deploy lean management approaches in our projects.

We have successfully designed and delivered an innovative moving line for aerospace assembly which resulted into a 57 % throughput increase and a 30 % recurring cost reduction for our customers.

We develop innovative connected solutions (Internet of Things, machine/process monitoring for conditional maintenance, virtual reality...) with a resulting goal of Total Cost for Ownership (TCO) reduction.

Integration of automation, assembly lines solutions coupled with robots and automated systems. For drilling and riveting activities.

**OUR LEAN
MANAGEMENT EXPERTS
PERFORM VALUE
STREAM MAPPING
AND ERGONOMICS
AND MAINTAINABILITY
ANALYSIS WHICH LEAD
TO OPTIMIZED DESIGN.**

“ Expertise in equipment and services to Airlines and MRO companies ”

MULTI-AIRCRAFTS MAINTENANCE BAYS FOR RENOWNED AIRLINES:

Qatar Airways,
Emirates Airlines,
British Airways,
Air France
...

AIRCRAFT ACCESS EQUIPMENT
DESIGNED TO OPTIMIZE MAINTENANCE OPERATIONS.

“ Airborne Products ”

DESIGN AND REALIZATION OF AIRBORNE EQUIPMENT USING REEL'S PROVEN KNOW-HOW IN COMPLEX MECHANICAL SYSTEMS.

Our expertise

Machining of complex aeronautics mechanical parts in hard and noble metals (Inconel, titanium, stainless steel ...).

Hard metal machining

High Precision (< 0,05mm)

Highly regulated environment

MANUFACTURE OF HIGH PRECISION AERONAUTICAL STEEL PARTS, UNDER EN9100 CERTIFICATION.

“Maintenance, Repair and Operations”

“AT YOUR SIDE,
OPTIMIZING YOUR
PRODUCTIVITY,
MAINTAINING YOUR
PRODUCTION LEVELS.”

MORE THAN 250
PERSONNEL ARE INVOLVED
WITH THIS MRO SERVICE
(MAINTENANCE, REPAIRS
& OPERATIONS), WORKING
EACH DAY TO OPTIMIZE
YOUR PRODUCTION.

Preventive, predictive and curative monitoring represents a significant part of REEL's activities in the aeronautical sector.

Maintenance is at the heart of our development strategy and is the best guarantee of your productivity.

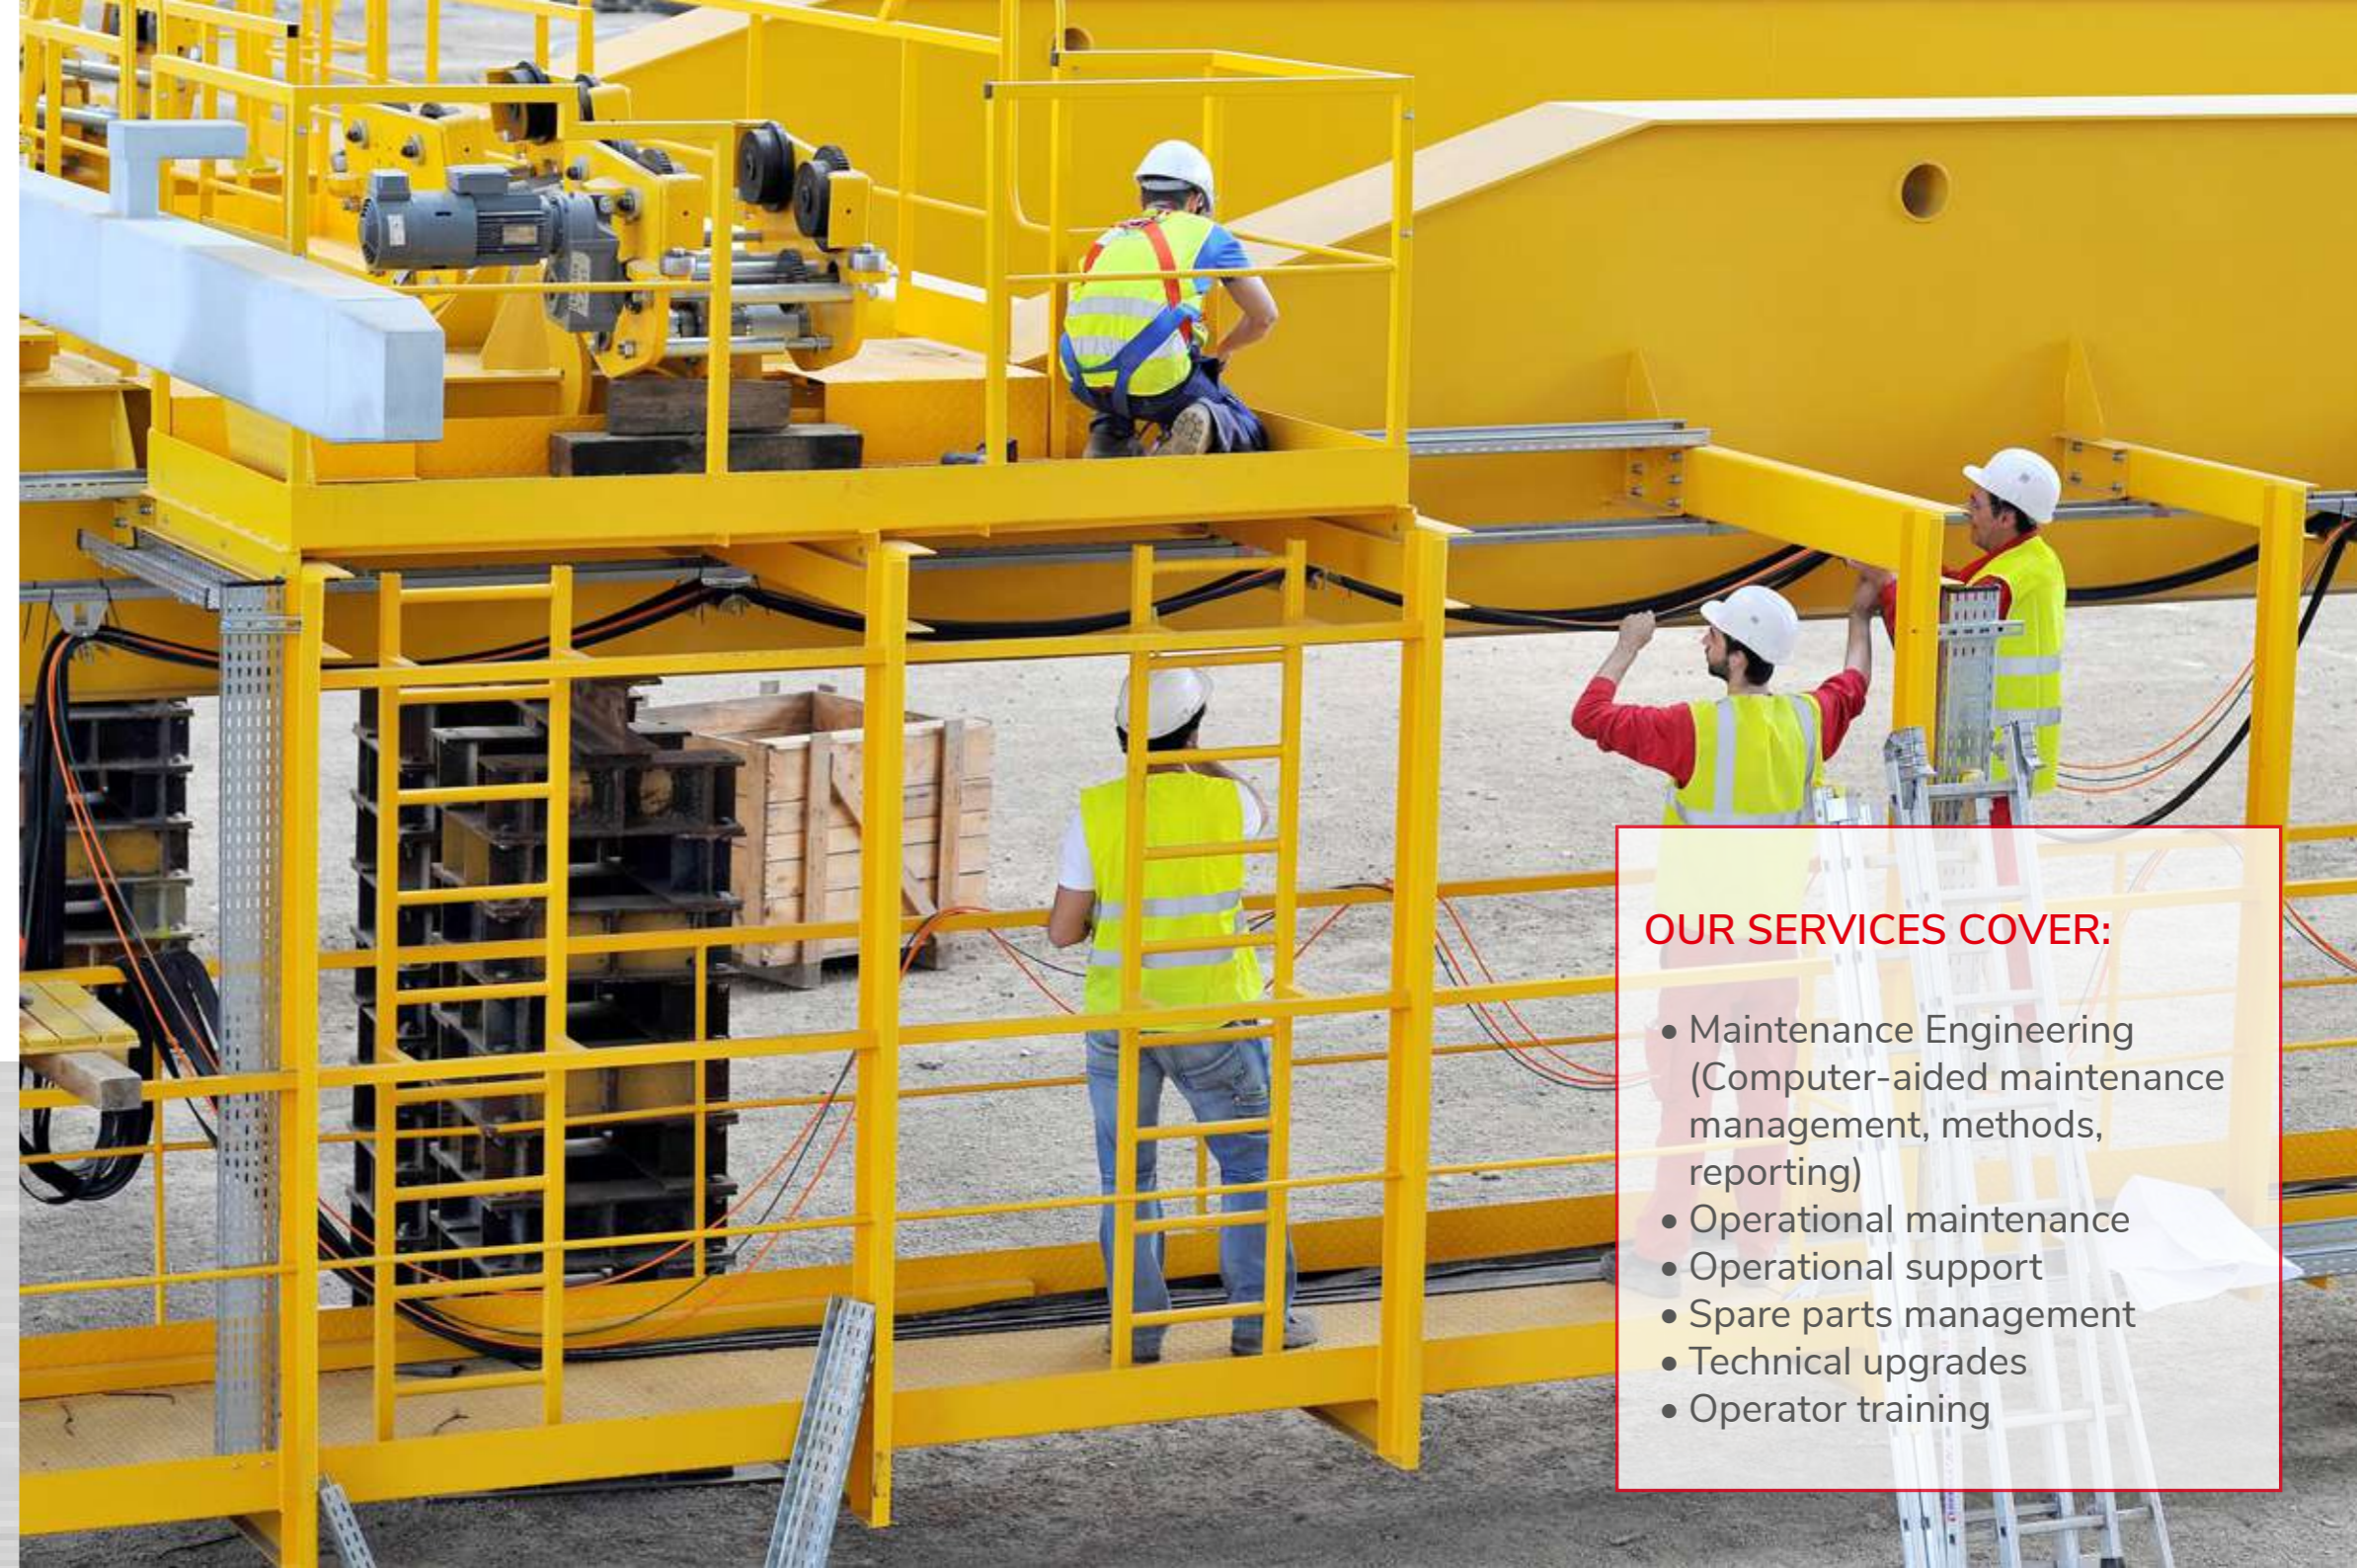

Experienced, local maintenance

Our maintenance contracts cover domains including assembly lines, tools required for GTE* and GSE** aeronautical maintenance and dedicated overhead cranes.

REEL developed a network of agencies and subsidiaries across the world, offering to its customers exhaustive services tailored to their needs.

*Ground Test Equipment

** Ground Support Equipment

OUR SERVICES COVER:

- Maintenance Engineering (Computer-aided maintenance management, methods, reporting)
- Operational maintenance
- Operational support
- Spare parts management
- Technical upgrades
- Operator training
